Hi Lynn,

I will never see the stormwater plan. You don't actually submit it, you just have it to use and show to any inspector who happens along.

I hope you didn't kick my name too hard. It has been feeling a bit bruised lately.  
I hear good things about Moose Habitat Inc. Good luck, I hope things continue to go well.

Hi Phil, I am working with Joey Allred on a project in Homer that is going to call for a storm water plan for you guys and I just want to give you a heads-up that its coming. Early notices can save a lot of headaches later on. We are going to use Ray Clapp with Coast Range Construction for our clearing, dirt work, water and sewer installation and silt fencing. With everything I have seen him do he has been very straight to work with and we are pleased to have him on board. We have been working with the Army Corp. and the wetlands on the project have been flagged. Next I want to contact David Nyman (Anchorage) and have hopefully have him file the Notice of Intent and develop the plan to meet EPA requirements. The project is adjacent to that fill on the right as you get past West Hill coming into Homer but before you get to the Best Western.

Ray Clapp likes David Nyman and recommends him. Unless I get a call from you with other suggested engineers we will proceed with him. Meanwhile I will search the EPA internet site and once again get a little familiar with the permit and reporting requirements.

I am looking forward to the pro-Pebble Mine presentation at the A.P. chamber Wednesday - maybe we'll see you there. Oh yes we kicked your name around at our moose habitat board meeting the other night. Thank you for working with Joe Meehan, he sure brings good things to the table regarding our interests.....Lynn Whitmore
